

Highlights of the Q4 report

- Total revenues in the fourth guarter of 2015 were MNOK 50.8 with a pre-tax profit of MNOK 28.9.
- Revenues and profitability were in line with expectations. Operating profit (EBIT) of MNOK 44.4 was similar to the previous quarter, while pre-tax profit of MNOK 28.9 was improved due to lower financial costs.
- On December 31st PPG paid is quarterly dividend to holders of preference shares¹ in total NOK 1.875 per preference share. The next scheduled dividend for preference shareholders is at the end of the first quarter 2016. See the company's website for updated financial calendar information.
- The Company had total assets of MNOK 3,619, where Investment Property (112 preschools) were valued at MNOK 3,413 in addition to a cash balance of MNOK 195. Total debt was MNOK 1,981 and with total equity of MNOK 1,638.
- In the fourth quarter PPG commissioned a valuation report from Newsec, which confirmed the balance sheet valuations of the Investment Properties.

Background and strategy

Pioneer Property Group ASA (PPG) is a real estate company focusing on providing high-quality properties for government-backed care-services. The company's current portfolio consists of 112 Norwegian kindergartens centrally located in the largest cities and which house a total of over eleven thousand children. The properties are leased out on long-term triple-net contracts to large kindergarten operators, including Norlandia Care Group and Espira.

The company's property portfolio is a result of the acquisition from several independent preschool operators, again driven by these companies' wish to free-up resources and capital to be able to provide the highest quality possible in their primary focus area – preschool operations. Pioneer Property's kindergartens have during the later years played an important role in the improvement of the Norwegian preschool market, through improved capacity, quality and cost-efficiency.

Going forward the company's strategy is to expand its reach into care-services property with similar characteristics as the Norwegian kindergarten market – i.e. long term contracts with solid operators, again backed by government financing.

PPG's kindergartens are well located in central areas, including Stavanger, Bergen, Kristiansand, and the greater Oslo area. The average age of the properties is at a low eight year average, and the quality of the properties is therefore very high. In total the properties have a capacity in excess of eleven thousand children.

Key material events during the fourth quarter

The fourth quarter, Q4/2015, was the second fully operational quarter of the Company since the establishment of the PPG group of companies earlier in 2015. All operations progressed as expected and there were no material unexpected events during the last quarter of the year. The company paid its scheduled Q4-dividend payment in the end of December.

Overview of the financial accounts for the third quarter of 2015

Revenues of MNOK 50.8 represents a run-rate of MNOK 17 in monthly rental revenues. Operating costs, and therefore also Operating Profit (EBIT) were similar to the third quarter, while reported pre-tax profit for the third quarter was improved to MNOK 28.9.

The balance sheet as of 31/12 includes Investment Property of MNOK 3,413, and no material events took place that should have impacted this valuation level. In addition, the company had MNOK 195 in cash balance at the end of the quarter – higher than required for PPG's underlying operations, but gives additional security

¹ For payments for 2015, «Dividend payments» are technically a repayment of paid in capital.

to the Company's planned dividend payments to the preference share owners over the next few years. On the debt side, PPG had a total of MNOK 1,981 in debt, including two separate bond-loans in the subsidiaries Pioneer Property II AS and Pioneer Property III AS, which are stock exchange listed bonds and report separate financial reports. See the company web-site to access the financial reports for PPPII and PPPIII.

Accounting policies:

The financial statements have been drawn up in accordance with International Standards for Financial Reporting (IFRS). Notes to the Financial Statements

Note 1: Financial risk management

1.1 Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including fair value interest rate risk and cash flow interest rate risk), credit risk and liquidity risk. The Group's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group's financial performance.

Risk management is carried out by management under guidance by the Board of Directors. Management identifies, evaluates and act upon financial risks.

a) Market risk

Market risk is the risk that future cash flows in the form of interest payments change as a result of changes in market interest rates. Management and the Board of Directors agree on an acceptable level of interest rate exposures, which are monitored continuously by management. The level of interest rate exposure is determined based on an assessment of existing cash flows, general assessment of financial condition and available liquidity.

(i) Fair value interest rate risk

The Group holds interest bearing assets in terms for cash deposits. Fluctuations in interest would yield a higher or lower interest income. At the current level of cash deposits a change in interest rate of +/- 1 % would not be material for the financial statements.

The Group's interest rate risk arises from long-term borrowings. The Group holds several types of borrowings. Refer to note 9 for details. Borrowings at fixed rates expose the Group to fair value interest rate risk.

(ii) Cash flow interest rate risk

Exposure to cash flow interest rate risk is assessed continuously. The need for a fixed rate is under constant review in relation to the Group to withstand adverse fluctuations in profit due to higher interest rates. Management's assessment is that the Group's current financial position does not indicate a further need for fixed interest rates.

If the interest rate had been +/- 1 % in Q4 2015 the profitability in the quarter after tax would be +/- MNOK 4.8 million, all other conditions unchanged and assuming a floating interest rate on 100% of the Company's borrowings.

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders holding ordinary shares, return capital to shareholders, refinance existing loans, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

b) Credit risk

Credit risk is the risk of loss when a party is unable to redeem their obligations to the Group, and credit risk is managed on a Group basis. Credit risk arises from cash and cash equivalents, and credit exposures customers, including outstanding receivables and committed transactions. Management assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on ratings. The utilization of credit limits is monitored regularly.

No credit limits were exceeded during the reporting period, and management does not expect any losses from non-performance by these counterparties.

Exposure to credit risk at the end of the period:	31-12-15
Accounts receivable	807
Other Short term receivable	9,801
Cash balance	195,329
Total exposure	205,936

The credit risk related to outstanding to related parties and banks is considered to be low.

c) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its obligations at maturity without incurring a significant increase in finance cost or not being able to meet its obligations at all. The risk also includes that the Group must forfeit investment opportunities. Cash flow forecasting is performed at Group level. Group management monitors the Group's liquidity requirements to ensure that it has sufficient cash to meet operational needs while maintaining sufficient headroom to avoid breaches in covenants on relevant borrowing facilities (refer to note 9), as well as capability to pay out quarterly

dividends to holders of preference shares. The monitoring takes into account the Group's debt financing plans and covenant compliance.

The table below analyses the Group's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows:

1.2 Capital management

The group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders holding ordinary shares, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet plus net debt.

Gearing ratio at the end of the period	31-12-15
Total borrowings	1,923,099
Less: Cash and cash equivalents	195,329
Net debt	1,727,770
Total equity	1,637,625
Total capital	3,365,396
Gearing ratio	51%

Note 2: Segment Summary

The Group's business is to own and manage investment properties in Norway and rent them out to operators of preschools. There is no material difference in risk and margins in the different investment properties. The Group is therefore considered to operate in one business area and in one geographical area. Further segment information is therefore not prepared.

The Group has three customers: Norlandia Barnehagene, Kidsa Barnehager and Espira. All of which contribute with more than 10 % of operating revenue.

Note 3: Critical estimates

The group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of items in the statement of financial position within the next financial year are addressed below.

a) Fair value of Investment Properties.

The fair value of investment properties is assessed quarterly by management. The Investment Properties are on a regular basis subject to on-site inspections and technical evaluations.

The properties are valued using normal property valuation methodologies and a description of the methodology and significant inputs are disclosed in note 11. Management assesses the cash flows from its properties to be stable without material uncertainty. The critical accounting estimates in the calculation, based on management's judgement is the yield factor.

The yield is calculated per investment property. The prime yield for pre-school properties is currently around 5.5%. Important input factors in the valuation are the property's location in relation to a major city, net-population change, size of the property/per child, year of build and whether or not the property is on a leased land (Norwegian: festetomt).

The average gross yield for the investment property portfolio is 6.0 %. Refer to note 11 for sensitivities.

Note 4: Contingencies and commitments

The Group has no contingent liabilities nor commitments as at 31 December 2015.

Note 5: Earnings per share

a) Basic

The Group's preference shares are entitled to a fixed dividend of NOK 7.50 per annum, if the General Assembly approves payment of dividends. To calculate the earnings per share the entitled dividend to the preference shares is deducted from comprehensive income for the period. The earnings per ordinary share is the remaining comprehensive income deducted the preference share dividend divided by the weighted average number of shares in issue during the period.

Calculation of EPS	Q2	Q3	Q4	YTD
Net profit	-4,293,789	13,349,000	27,107,828	36,163,039

b) Diluted

As per 31 December 2015 no rights are issued which cause diluted earnings per share to be different to basic earnings per share.

Refer to note 16 for information related to the classes of shares.

Note 6: Cash and cash equivalents

Cash and cash equivalents	31-12-15

Note 10: Changes in group structure, acquisitions during the year and subsidiaries

The Company was incorporated 5 January 2015. The Group was formed after the acquisition of Pioneer Public Properties I AS, (PPP I), Pioneer Public Properties II AS (PPP III), Pioneer Public Properties III AS (PPP III) and Pioneer Public Properties IV AS (PPP IV) on 12 May 2015.

The acquisitions of PPP I, PPP II AS, PPP III and PPP IV included investment properties, liabilities and rent agreements. No employee or management contract was included in the acquisition. Based on the underlying facts and circumstances, management has evaluated that the purchases were not in scope of IFRS 3, but a purchase of a group of assets. Therefore no goodwill was recognized and the initial recognition exemption for recognising deferred tax was applied.

The following table summarises the consideration paid for PPP, PPP II, PPP III and PPP IV, the fair value of assets acquired, liabilities assumed at the acquisition date.

Note 11: Investment property

The Group rents out the investment properties on long term triple net contracts, with an exception on the properties leased to Espira, one of the Group's three customers (ref note 3). On average there are 17 years remaining on the lease agreements. All agreements are fully CPI-adjusted annually. The Group does not have any future capital expenditure on properties as all maintenance is carried by the tenant as agreed upon in the lease agreements. The properties are primarily located in the greater Oslo area, Bergen, the greater Stavanger area, Bodø and Tromsø. See the Company's web site for a full list and map of all the properties. The investment properties are valued in accordance with the fair value method and all have been valued in accordance with valuation Level 3. The yield level of the properties has been determined on the basis of their unique risk and transactions made at the respective location according to the location price method. At the end of 2015, the Company has valued its portfolio based upon a gross average 6% yield - however an external cash-flow valuation for all the individual properties, to support the Company's valuation approach, was also carried out by external company Newsec.

Valuation

The Group uses yield valuation according to the cash flow method for external and internal valuations. The same valuation method has been used for all of the Group's properties.

Sensitivity analysis

A property analysis is an estimate of the value that an investor is willing to pay for the property at a given time. The valuation is made on the basis of generally accepted models and certain assumptions on different parameters. The market value of the properties can only reliably established in a transaction between two independent parties. An uncertainty interval is stated in the property values and is between +/- 5 per cent in a normal market. A changed property value of +/- 5 per cent affects the Group's property value by +/- NOK 171 million.

The Company has two classes of shares, ordinary shares and preference shares. The face value per share for both ordinary and preference shares classes is NOK 1. Share premium for all shares issued in the period is of NOK 99 per share.

About the shares: The differences between the share classes are differing voting rights and differing rights to the Company's profit. Besides voting rights, the difference between the Company's share classes is that the preference shares entail a preferential right to the Company's profit through a preferential right over ordinary shares to dividends. The regulations on voting rights and dividends are decided upon by the Shareholders' Meeting and can be found in the Articles of Association.

The ordinary shares: The Company's ordinary share confers one vote unlike the preference shares that confer one-tenth of a vote.

The preference share: The Company's preference shares confer a preferential right over ordinary shares to an annual dividend of NOK 7.50 per preference share. Dividend payments are made quarterly with NOK 1.875 per preference share, if approved by the General Assembly. The preference share does not otherwise confer a right to dividend. If the general meeting decided not to pay dividends or to pay dividends that fall below NOK 1.875 per preference share during a quarter, the difference between paid dividends and NOK 1.875 per preference share shall be accumulated and adjusted upwards with an annual interest rate of 5 per cent until full dividends have been distributed. No dividends may be distributed to the ordinary shareholders until the preference shareholders have received full dividends including the withheld amount. Any difference between NOK 1.875 per preference share and the dividend paid per preference share is accumulated for each quarter.

Detailed information regarding dividends, issues and redemption can be found in the Company's Articles of Association, available in the prospectus via the Company's website.
